

# Oral Moisturizing Gel

For over 15 years, bioXtra Oral Gel has been used to successfully treat dry mouth and associated symptoms in Europe and around the world. Now, bioXtra is available in the United States.

bioXtra Oral Gel Contains:

- Glucose Oxidase
- Lactoperoxidase
- Potassium Thiocyanate
- Lactoferrin
- Lysozyme

Saliva moisturizes and lubricates the oral cavity and is an important part of the mouth's natural defense system. Reduced saliva production can lead to dry mouth and disrupt the natural microenvironment of the mouth, resulting in discomfort, bad breath, and poor oral health, which can affect health and well being.

bioXtra can provide symptomatic relief from chronic or temporary dry mouth and associated symptoms through a combination of moisturizers that soothe and lubricate, and naturally occurring enzymes found in the oral cavity and saliva that help regulate the microenvironment of the mouth.

### Compare to Biotene OralBalance Gel<sup>1</sup>

Unlike Biotene\* OralBalance\* Gel, bioXtra Oral Gel contains naturally occurring lactoperoxidase enzymes, lactoferrin and lysozyme.

Reorder Number 8648

To use, apply bioXtra oral gel liberally to gums and tongue, or under dentures to relieve dryness, especially at night. Remove or spit out excess.
