

Polyurethane Enteral Feeding Tube

The open end design, with precision drilled side holes, enhances fluid flow and decreases potential feeding stagnation and mucosal irritation.

The hub is clearly marked with "ORAL" and French size to readily identify the tube as an enteral feeding tube.

Polyurethane Enteral Feeding Tube

- Unique polyurethane tube with silicone overlaid hub designed to provide secure enteral only connections
- Labeling supports ISMP recommendations that all distal ports and tubing of access lines clearly indicate what is the use of the port/line
- Bold, indelible markings every centimeter
- Color coded for patient safety
- Polyurethane's tensile strength allows thin wall construction designed for increased flow rates and decreased clogging with proper maintenance
- Latex and DEHP free
- Integrated closure plug for easy cleaning
- Radiopaque stripe for confirmation of tip placement by x-ray
