

Silicone Enteral Feeding Tube

The open end design, with precision drilled side holes, enhances fluid flow and decreases potential feeding stagnation and mucosal irritation.

The hub is clearly marked with "ORAL" and French size to readily identify the tube as an enteral feeding tube.

Silicone Enteral Feeding Tube

- Made of soft, biocompatible medical grade silicone designed to enhance extended dwell protocols
- Labeling supports ISMP recommendations that all distal ports and tubing of access lines clearly indicate what is the use of the port/line
- Bold, indelible markings every centimeter
- Color coded for patient safety
- Enteral connector designed to prevent misconnections
- Integrated closure plug for easy cleaning
- Radiopaque stripe for confirmation of tip placement by x-ray
- Latex and DEHP free
